

# Everything You Need To Know About Planting & Storing Your Heirloom Seeds

Everything You Need To Know About  
Planting & Storing Your Heirloom Seeds

## Hello, from Grow For It!

Thank you for trusting us with your heirloom seeds order. As a bonus gift for being such a great customer of ours, we would like to give you complete planting, sprouting and storing instructions for your heirloom seeds.

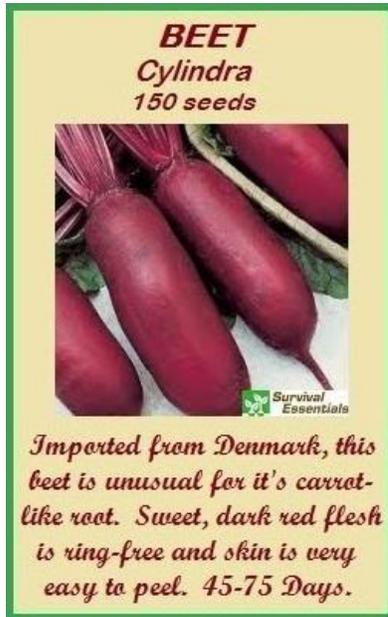

It will have information on each of the 50 seed varieties you now own, as illustrated in the succeeding pages.

We hope you enjoy this little gift from us at HGA, and best luck on your home garden!

**PLANTING**

**Quantity:** 150 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 2” to 3”  
**Row Spacing:** 12” to 18”  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** 2 weeks before last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Half Hardy  
**Days to Maturity:** 50-60 days  
**Life Cycle:** Biennial

**Companion Plants:** Cabbage, celery, chamomile, chard, dwarf beans, kohlrabi, lettuce, onions, silverbeet, spinach

**Incompatible Plants:** Runner beans, tall beans

**Quantity:** 150 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 2” to 3”  
**Row Spacing:** 12” to 18”  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** 2 weeks before last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Half Hardy  
**Days to Maturity:** 48-55 days  
**Life Cycle:** Biennial

**Companion Plants:** Cabbage, celery, chamomile, chard, dwarf beans, kohlrabi, lettuce, onions, silverbeet, spinach

**Incompatible Plants:** Runner beans, tall beans

**BROCCOLI**  
*Green Sprouting Calabrese*  
 100 seeds

*An increasingly popular variety delicious eaten raw, steamed, or stir-fried. Easy to grow and highly productive.*

**Quantity:** 100 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 18” to 24”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 3-5 weeks before last frost date  
**Direct Sowing:** 2 weeks after last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 58-60 days  
**Life Cycle:** Biennial

**Companion Plants:** Basil, beet, chamomile, cucumber, dill, mint, nasturtiums, onions, oregano, peas, rosemary, sage, tomatoes  
**Incompatible Plants:** Beans, strawberries

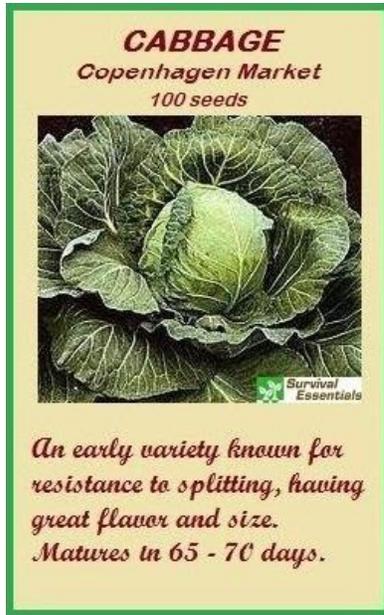

**BRUSSELS SPROUTS**  
*Long Island Improved*  
 150 seeds

*The most popular Brussel Sprout is high yielding, and grows to about 24” high. Does best in cool temperatures. Great for frozen storage. 110 days.*

**Quantity:** 150 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 18” to 24”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** Not recommended  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 90-115 days  
**Life Cycle:** Annual

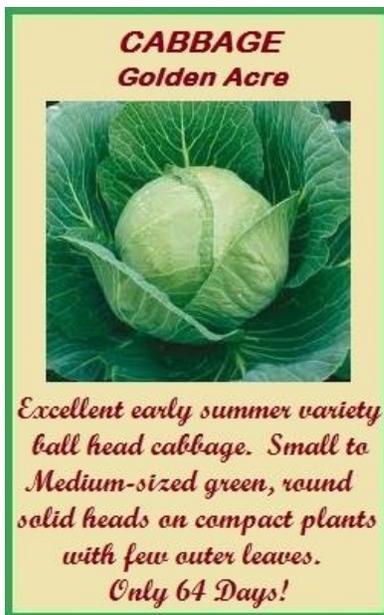

**Companion Plants:** Artichoke, beet, peas, potatoes, rosemary, sage, spinach  
**Incompatible Plants:** Grapes, kohlrabi, pole beans, strawberries, tomatoes

**Quantity:** 100 Seeds  
**Soil Temperature:** 40 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 10” to 18”  
**Row Spacing:** 24” to 30”  
**Indoor Sowing:** 4-6 weeks before last frost date  
**Direct Sowing:** Not recommended  
**Germination Time:** 7-12 days  
**Sun Exposure:** Full Sun (6 hours daily);  
 For warm climates, provide partial shade.  
**Growing Condition:** Cold, cool, short days  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 65-75 days  
**Life Cycle:** Biennial

**Companion Plants:** Beans, celery, cucumber, dill, kale, lettuce, onions, potatoes, sage, spinach, thyme

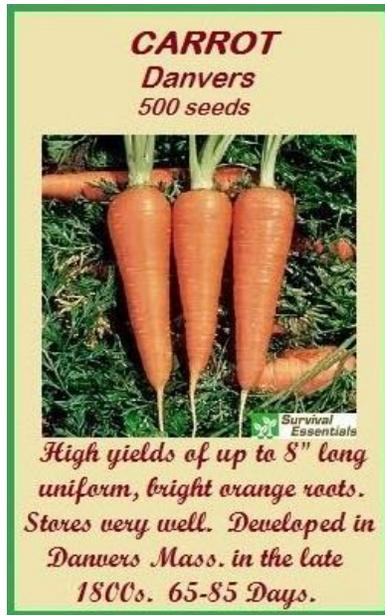

**Incompatible Plants:** Broccoli, cauliflower, oregano, strawberries, tomatoes

**Quantity:** 100 Seeds  
**Soil Temperature:** 40 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 18” to 24”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 4-6 weeks before last frost date  
**Direct Sowing:** 12-16 weeks before first fall frost  
**Germination Time:** 5-14 days  
**Sun Exposure:** Full Sun (6 hours daily);  
 For warm climates, provide partial shade.  
**Growing Condition:** Cold, cool, short days  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 58-65 days  
**Life Cycle:** Biennial

**Companion Plants:** Beans, celery, cucumber, dill, kale, lettuce, onions, potatoes, sage, spinach, thyme

**Incompatible Plants:** Broccoli, cauliflower, oregano, strawberries, tomatoes

**Quantity:** 500 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ¼" – ½"  
**Plant Spacing:** 2" to 3"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2-3 weeks before last frost date  
**Germination Time:** 14-21 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cool, warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 65-75 days  
**Life Cycle:** Biennial

**Companion Plants:** Beans, lettuce, onions, peas, radish, rosemary, sage, tomatoes

**Incompatible Plants:** Anise, dill, parsley

**Quantity:** 500 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ¼" – ½"  
**Plant Spacing:** 2" to 3"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2-3 weeks before last frost date  
**Germination Time:** 14-21 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cool, warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 65-75 days  
**Life Cycle:** Biennial

**Companion Plants:** Beans, lettuce, onions, peas, radish, rosemary, sage, tomatoes

**Incompatible Plants:** Anise, dill, parsley

**CAULIFLOWER**  
*Snowball Y Improved*  
100 seeds

*Large white, delicious solid heads are of excellent quality. Serve cooked, steamed, or raw with dips or in salads.*

**Quantity:** 100 Seeds  
**Soil Temperature:** 50 – 85° F  
**Seed Planting Depth:** ¼” – ½”  
**Plant Spacing:** 15” to 18”  
**Row Spacing:** 24” to 26”  
**Indoor Sowing:** 6 weeks before last frost date  
**Direct Sowing:** 2-3 weeks before last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cool  
**Water Requirement:** High  
**Hardiness:** Half Hardy  
**Days to Maturity:** 52-65 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, beans, dill, garlic, hyssop, lettuce, marigold, mint, onions, rosemary, sage, thyme  
**Incompatible Plants:** Grapes, peas, rue, strawberries, tomatoes

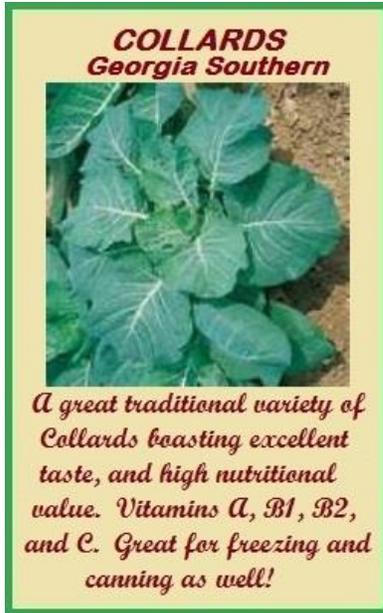

**CELERY**  
*Tall Utah*  
300 seeds

*You haven't tasted real celery if you haven't tasted home grown Tall Utah! Produces 11" tender, crisp stalks. Grows to an overall height of 30".*

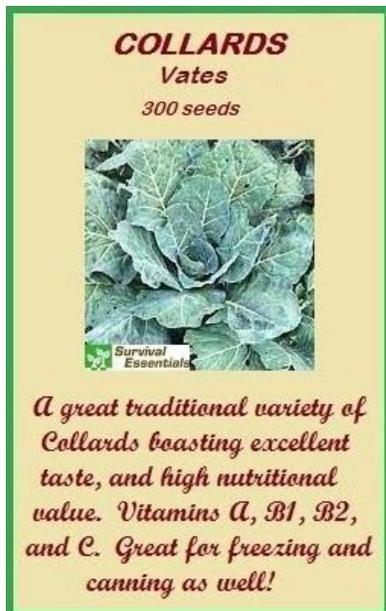

**Quantity:** 300 Seeds  
**Soil Temperature:** 50 – 70° F  
**Seed Planting Depth:** 1/16”  
**Plant Spacing:** 9” to 12”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 8-10 weeks before last frost date  
**Direct Sowing:** Not recommended  
**Germination Time:** 7-12 days  
**Sun Exposure:** Light Shade (6 hours daily)  
**Growing Condition:** Cool  
**Water Requirement:** High  
**Hardiness:** Half Hardy  
**Days to Maturity:** 70-125 days  
**Life Cycle:** Biennial

**Companion Plants:** Bush beans, cabbage, nasturtiums, onions, spinach, tomatoes  
**Incompatible Plants:** Carrots, parsley, parsnip

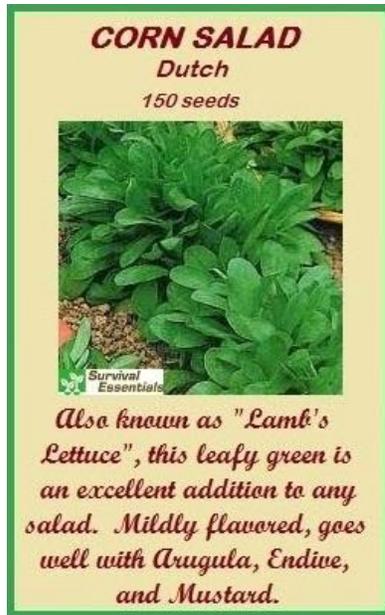

**Quantity:** 300 Seeds  
**Soil Temperature:** 55 – 70° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 12” to 18”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 6-8 weeks before last frost date  
 (Start indoors if insects and pests are a problem)  
**Direct Sowing:** 2-8 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun / Partial Shade (6 hours)  
**Growing Condition:** Cold, cool, warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Super Hardy  
**Days to Maturity:** 75-85 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, beans, chamomile, dill, garlic, mint, nasturtiums, onions, potatoes, rosemary, sage, southernwood, thyme  
**Incompatible Plants:** Grapes, rue, tansy

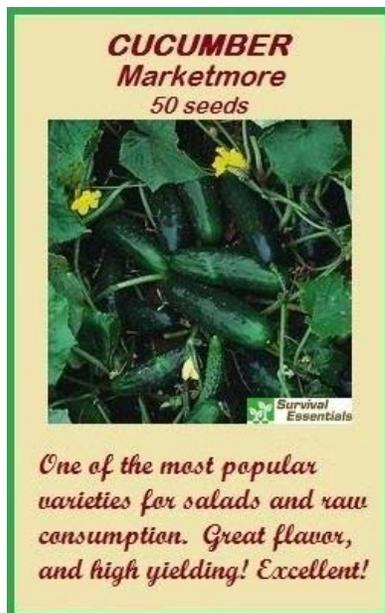

**Quantity:** 300 Seeds  
**Soil Temperature:** 55 – 70° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 12” to 18”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 6-8 weeks before last frost date  
 (Start indoors if insects and pests are a problem)  
**Direct Sowing:** 2-8 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun / Partial Shade (6 hours)  
**Growing Condition:** Cold, cool, warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Super Hardy  
**Days to Maturity:** 75-85 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, beans, chamomile, dill, garlic, mint, nasturtiums, onions, potatoes, rosemary, sage, southernwood, thyme  
**Incompatible Plants:** Grapes, rue, tansy

**Quantity:** 150 Seeds  
**Soil Temperature:** 40 – 65° F  
**Seed Planting Depth:** ¼ – ½"  
**Plant Spacing:** 3" to 6"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 4-6 weeks before last frost date  
**Germination Time:** 10-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** High  
**Hardiness:** Hardy  
**Days to Maturity:** 90-100 days  
**Life Cycle:** Annual

**Companion Plants:** Beets, cabbage, clover, peas, peppers, radish, tomatoes  
**Incompatible Plants:** Celery, cress, parsley

**Quantity:** 50 Seeds  
**Soil Temperature:** 60 – 85° F  
**Seed Planting Depth:** ½"  
**Plant Spacing:** 12" to 24"  
**Row Spacing:** 5' to 6'  
**Indoor Sowing:** 2 weeks after last frost date  
**Direct Sowing:** 3-4 weeks after last frost date  
**Germination Time:** 4-12 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 55-60 days  
**Life Cycle:** Annual

**Companion Plants:** Beans, cabbage, cauliflower, corn, lettuce, peas, radish, sunflowers  
**Incompatible Plants:** Aromatic herbs, melons, potatoes

**CUCUMBER**  
*Boston Pickling*  
 50 seeds

*A favorite for pickling, yields are high and continuous. Perfect for sweet or dill pickles. Harvest when 2" to 7" long.*

**Quantity:** 50 Seeds  
**Soil Temperature:** 60 – 85° F  
**Seed Planting Depth:** ½"  
**Plant Spacing:** 12" to 24"  
**Row Spacing:** 5' to 6'  
**Indoor Sowing:** 2 weeks after last frost date  
**Direct Sowing:** 3-4 weeks after last frost date  
**Germination Time:** 4-12 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 50-60 days  
**Life Cycle:** Annual

**Companion Plants:** Beans, cabbage, cauliflower, corn, lettuce, peas, radish, sunflowers

**Incompatible Plants:** Aromatic herbs, melons, potatoes

**DILL**  
*Long Island Mammoth*  
 100 seeds

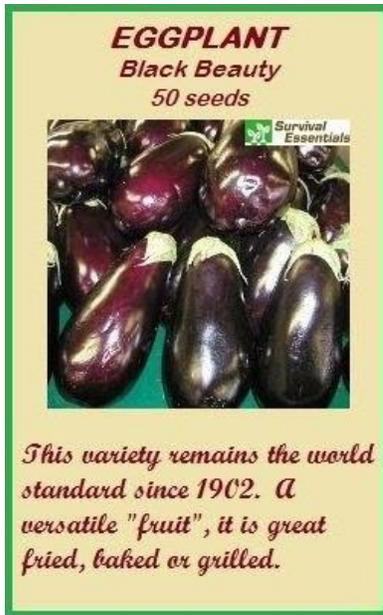

*Leaves are used in salads and dips, and used to flavor meats, fish and soups. Seeds used in pickle recipes, and to flavor baked goods. Grows 3'-5' tall.*

**Quantity:** 100 Seeds  
**Soil Temperature:** 60 – 75° F  
**Seed Planting Depth:** ¼ – ½"  
**Plant Spacing:** 12" to 18"  
**Row Spacing:** 18" to 24"  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2-6 weeks after last frost date  
**Germination Time:** 12-18 days  
**Sun Exposure:** Full Sun (6 hours daily);  
 Also needs protection from strong winds.  
**Growing Condition:** Cold, cool, warm  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 40-60 days  
**Life Cycle:** Annual

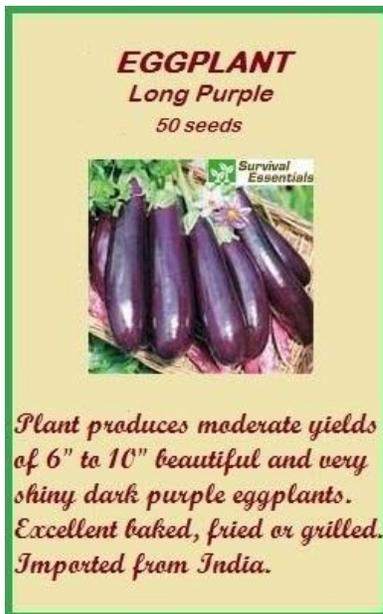

**Companion Plants:** Asparagus, broccoli, cabbage, corn, cucumber, lettuce, onions, roses, marigold

**Incompatible Plants:** Carrots, cilantro, potatoes, tomatoes

**Quantity:** 50 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼ – ½"  
**Plant Spacing:** 18" to 24"  
**Row Spacing:** 30" to 36"  
**Indoor Sowing:** 4-6 weeks before last frost date  
**Direct Sowing:** 6-8 weeks after last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Tender  
**Days to Maturity:** 72-90 days  
**Life Cycle:** Annual

**Companion Plants:** Bush beans, catnip, garlic, marigold, peas, peppers, potatoes, spinach, tarragon, thyme  
**Incompatible Plants:** Apricot, corn, tomatoes

**Quantity:** 50 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼"  
**Plant Spacing:** 18" to 24"  
**Row Spacing:** 24" to 36"  
**Indoor Sowing:** 4-6 weeks before last frost date  
**Direct Sowing:** 6-8 weeks after last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Tender  
**Days to Maturity:** 70-75 days  
**Life Cycle:** Annual

**Companion Plants:** Bush beans, catnip, garlic, marigold, peas, peppers, potatoes, spinach, tarragon, thyme  
**Incompatible Plants:** Apricot, corn, tomatoes

**KALE**  
*Dwarf Siberian*  
 500 seeds

*A leafy green that grows well even in warmer temperatures. Great steamed or with stir fry dishes. Excellent for attracting deer when plot planted.*

**Quantity:** 500 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 18” to 24”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 5 weeks before last frost date  
**Direct Sowing:** 2-4 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool, warm  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 50-65 days  
**Life Cycle:** Biennial

**Companion Plants:** Beets, celery, cucumber, dill, garlic, herbs, hyssop, lettuce, mint, nasturtiums, onions, potatoes, rosemary, sage, spinach, Swiss chard  
**Incompatible Plants:** Beans, grapes, rue, strawberries, tomatoes

**KOHLRABI**  
*Purple Vienna*  
 200 seeds

*An unusual, but great tasting and incredibly nutritious vegetable tastes mildly like broccoli with a hint of cabbage. Can be eaten raw or cooked. Roast, steam or add to soups.*

**Quantity:** 200 Seeds  
**Soil Temperature:** 50 – 85° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 6” to 8”  
**Row Spacing:** 12”  
**Indoor Sowing:** 4-5 weeks before last frost date  
**Direct Sowing:** 4-6 weeks before last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 55-65 days  
**Life Cycle:** Annual

**Companion Plants:** Beets, celery, herbs, onions, potatoes  
**Incompatible Plants:** Pole beans, strawberries, tomatoes

**LETTUCE**  
**Black Seeded Simpson**  
 500 seeds

*A favorite leaf lettuce with bright green leaves, which are tender and mild at all stages of growth. 45 days.*

**Quantity:** 500 Seeds  
**Soil Temperature:** 60 – 70° F  
**Seed Planting Depth:** 1/8"  
**Plant Spacing:** 8" to 12"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** 5-6 weeks before last frost date  
**Direct Sowing:** 2-4 weeks after last frost date  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, warm  
**Water Requirement:** Moderate  
**Hardiness:** Half Hardy  
**Days to Maturity:** 40-65 days  
**Life Cycle:** Annual

**Companion Plants:** Asparagus, beets, Brussels sprouts, cabbage, carrots, corn, cucumber, eggplant, onions, peas, potatoes, radish, spinach, strawberries, sunflowers, tomatoes

**Incompatible Plants:** Broccoli, celery, parsley

**LETTUCE**  
**Bronze Mignonette**  
 500 seeds

*Produces "loose leaf" heads of bi-colored lettuce great for salads, sandwiches and wraps. Heat tolerant and slow bolting. 65 days*

**Quantity:** 500 Seeds  
**Soil Temperature:** 60 – 70° F  
**Seed Planting Depth:** 1/8"  
**Plant Spacing:** 8" to 12"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** 5-6 weeks before last frost date  
**Direct Sowing:** 2-4 weeks after last frost date  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, warm  
**Water Requirement:** Moderate  
**Hardiness:** Half Hardy  
**Days to Maturity:** 60-65 days  
**Life Cycle:** Annual

**Companion Plants:** Asparagus, beets, Brussels sprouts, cabbage, carrots, corn, cucumber, eggplant, onions, peas, potatoes, radish, spinach, strawberries, sunflowers, tomatoes

**Incompatible Plants:** Broccoli, celery, parsley

**Quantity:** 500 Seeds  
**Soil Temperature:** 60 – 70° F  
**Seed Planting Depth:** 1/8"  
**Plant Spacing:** 8" to 12"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** 5-6 weeks before last frost date  
**Direct Sowing:** 2-4 weeks after last frost date  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, warm  
**Water Requirement:** Moderate  
**Hardiness:** Half Hardy  
**Days to Maturity:** 48-53 days  
**Life Cycle:** Annual

**Companion Plants:** Asparagus, beets, Brussels sprouts, cabbage, carrots, corn, cucumber, eggplant, onions, peas, potatoes, radish, spinach, strawberries, sunflowers, tomatoes

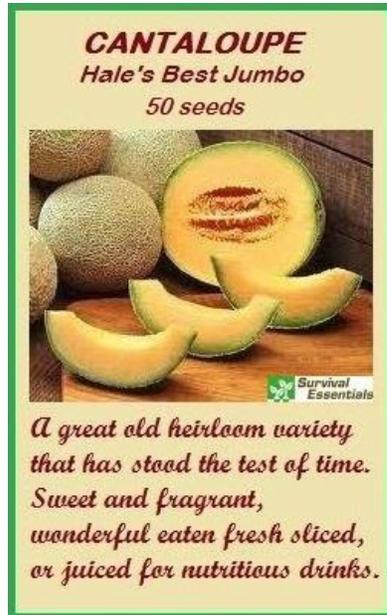

**Incompatible Plants:** Broccoli, celery, parsley

**Quantity:** 500 Seeds  
**Soil Temperature:** 60 – 70° F  
**Seed Planting Depth:** 1/8"  
**Plant Spacing:** 8" to 12"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** 5-6 weeks before last frost date  
**Direct Sowing:** 2-4 weeks after last frost date  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, warm  
**Water Requirement:** Moderate  
**Hardiness:** Half Hardy  
**Days to Maturity:** 48-50 days  
**Life Cycle:** Annual

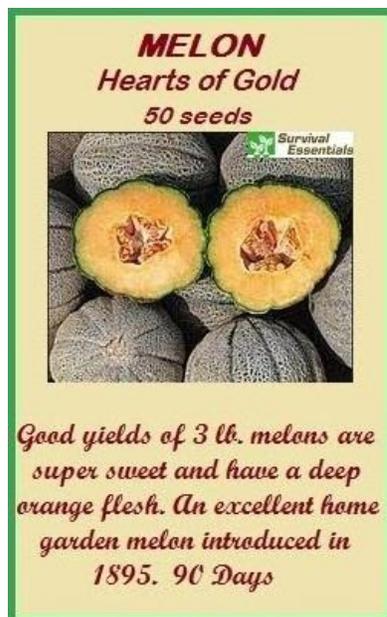

**Companion Plants:** Asparagus, beets, Brussels sprouts, cabbage, carrots, corn, cucumber, eggplant, onions, peas, potatoes, radish, spinach, strawberries, sunflowers, tomatoes

**Incompatible Plants:** Broccoli, celery, parsley

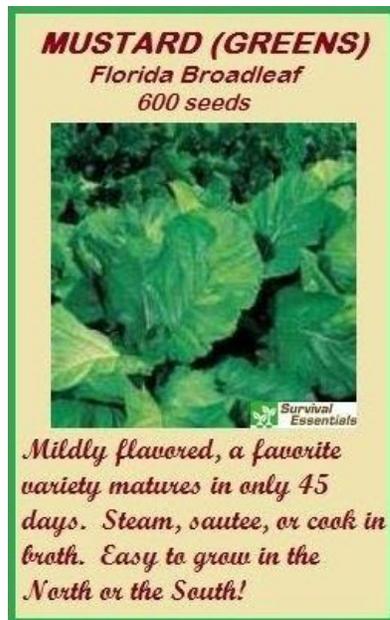

**Quantity:** 50 Seeds  
**Soil Temperature:** 65 – 80° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 36” to 48”  
**Row Spacing:** 4’ to 6’  
**Indoor Sowing:** 3-4 weeks before last frost date  
**Direct Sowing:** 1-2 weeks after last frost date;  
 Ideal only if you have a long, hot growing season.  
**Germination Time:** 4-8 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Very Tender  
**Days to Maturity:** 74-88 days  
**Life Cycle:** Annual

**Companion Plants:** Anise, basil, bee balm, catnip, chives, cilantro, corn, dill, garlic, marigold, mint, nasturtiums, onions, pumpkins, radish, sage, tansy  
**Incompatible Plants:** Potatoes

**Quantity:** 50 Seeds  
**Soil Temperature:** 65 – 80° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 36” to 48”  
**Row Spacing:** 4’ to 6’  
**Indoor Sowing:** 3-4 weeks before last frost date  
**Direct Sowing:** 1-2 weeks after last frost date;  
 Ideal only if you have a long, hot growing season.  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Very Tender  
**Days to Maturity:** 70-97 days  
**Life Cycle:** Annual

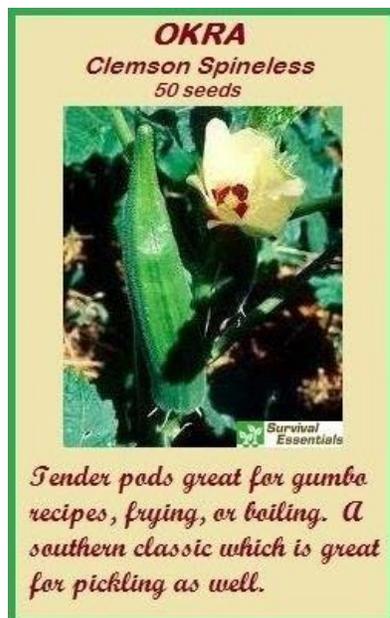

**Companion Plants:** Anise, basil, bee balm, catnip, chives, cilantro, corn, dill, garlic, marigold, mint, nasturtiums, onions, pumpkins, radish, sage, tansy  
**Incompatible Plants:** Potatoes

**Quantity:** 600 Seeds  
**Soil Temperature:** 65 – 75° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 3” to 6”  
**Row Spacing:** 18”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2-4 weeks before last frost date  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 30-55 days  
**Life Cycle:** Annual

**Companion Plants:** Dill, English peas, fennel, flowering buckwheat, jasmine, mint, snap peas, tansy, turnips, yarrow

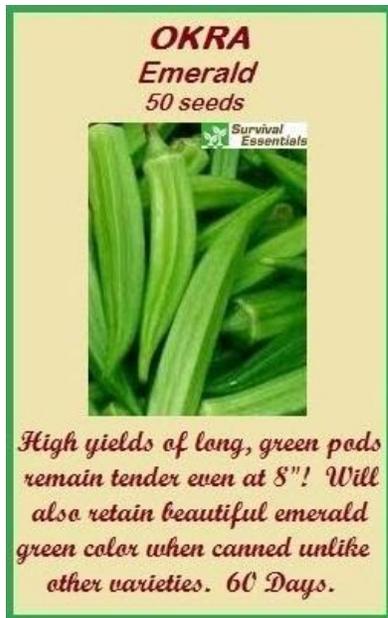

**Incompatible Plants:** Dried beans, field pennycress, pigweed, shepherd's purse, soybeans, sunflowers, wild mustard

**Quantity:** 50 Seeds

**Seed Planting Depth:** ½ – 1”  
**Plant Spacing:** 12” to 18”  
**Row Spacing:** 36” to 48”  
**Indoor Sowing:** 2-4 weeks before last frost date  
**Direct Sowing:** 3-5 weeks after last frost date; Ideal if your growing season is long enough.  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 52-64 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, cucumber, eggplant, melons, peas, peppers, radish, snow pea vines, sunflowers

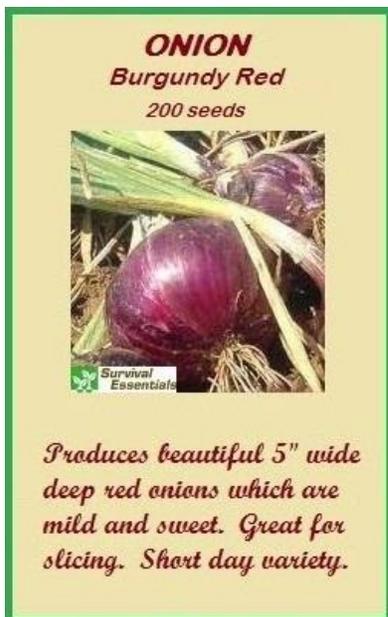

**Incompatible Plants:** No known bad companion plants

**Quantity:** 50 Seeds  
**Soil Temperature:** 70 – 95° F  
**Seed Planting Depth:** ¼"  
**Plant Spacing:** 12" to 24"  
**Row Spacing:** 36" to 48"  
**Indoor Sowing:** 2-4 weeks before last frost date  
**Direct Sowing:** 3-5 weeks after last frost date;  
 Ideal if your growing season is long enough.  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 66-72 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, cucumber, eggplant, melons, peas, peppers, radish, snow pea vines, sunflowers

**Incompatible Plants:** No known bad companion plants

**Quantity:** 200 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ¼ – ½"  
**Plant Spacing:** 4" to 6"  
**Row Spacing:** 12" to 18"  
**Indoor Sowing:** 16 weeks before last frost date  
**Direct Sowing:** 4-6 weeks before last frost date  
**Germination Time:** 10-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool, warm, long days  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 100-150 days  
**Life Cycle:** Biennial

**Companion Plants:** Beets, broccoli, cabbage, carrots, cucumber, lettuce, peppers, potatoes, radish, spinach, squash, tomatoes

**Incompatible Plants:** Beans, peas, sage

**ONION**  
*White Sweet Spanish*  
 200 seeds

*Produces large globe shaped onions up to 1 lb. This variety sets the standard for white onion varieties. A very good storing onion. Approx. 115 days.*

**Quantity:** 200 Seeds  
**Soil Temperature:** 55 – 75° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 4” to 6”  
**Row Spacing:** 12” to 18”  
**Indoor Sowing:** 16 weeks before last frost date  
**Direct Sowing:** 4-6 weeks before last frost date  
**Germination Time:** 10-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool, warm, long days  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 100-150 days  
**Life Cycle:** Biennial

**Companion Plants:** Beets, broccoli, cabbage, carrots, cucumber, lettuce, peppers, potatoes, radish, spinach, squash, tomatoes  
**Incompatible Plants:** Beans, peas, sage

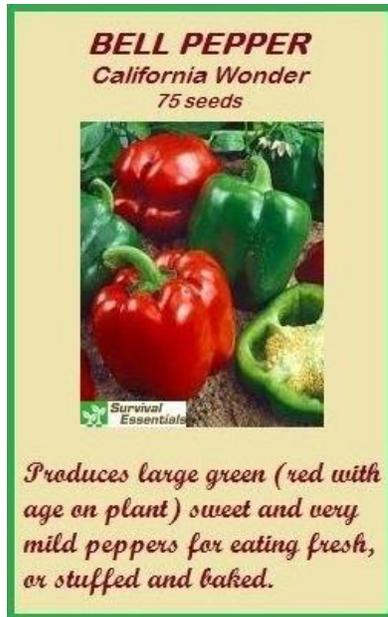

**PARSNIP**  
*Hollow Crown*  
 250 seeds

*Produces large 15 inch long, & 3” wide smooth, off-white roots with a sweet, nutty flavor. Can be used like carrots in stews and soups or can be steamed, sauteed in butter, or fried.*

**Quantity:** 250 Seeds  
**Soil Temperature:** 45 – 75° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 2” to 4”  
**Row Spacing:** 18” to 24”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2 weeks before last frost date  
**Germination Time:** 2-3 weeks  
**Sun Exposure:** Does good in light shade, but more productive in full sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 95-110 days  
**Life Cycle:** Annual

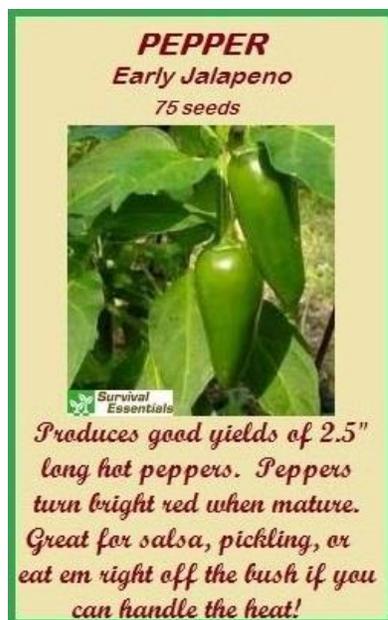

**Companion Plants:** Bush beans, garlic, onions, peas, peppers, potatoes, radish  
**Incompatible Plants:** Caraway, carrots, celery, larkspur

**Quantity:** 75 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 12” to 24”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** Not recommended  
**Germination Time:** 10-21 days  
**Sun Exposure:** Full Sun (6 hours daily);  
 For very warm climates, provide light shade.  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Very Tender  
**Days to Maturity:** 70-75 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, coriander, marjoram, onions, oregano, parsley, rosemary, spinach, squash, tomatoes

**Incompatible Plants:** Apricot, beans, broccoli, Brussels sprouts, cabbage, fennel, kale, kohlrabi, mustard

**Quantity:** 75 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 12” to 18”  
**Row Spacing:** 24” to 36”  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** Not recommended  
**Germination Time:** 10-21 days  
**Sun Exposure:** Full Sun (6 hours daily);  
 For very warm climates, provide light shade.  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Very Tender  
**Days to Maturity:** 72-75 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, coriander, marjoram, onions, oregano, parsley, rosemary, spinach, squash, tomatoes

**Incompatible Plants:** Apricot, beans, broccoli, Brussels sprouts, cabbage, fennel, kale, kohlrabi, mustard

**PUMPKIN**  
*Small Sugar*  
25 seeds

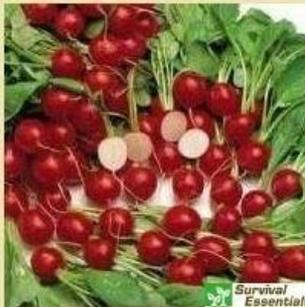

*A culinary variety prized for its taste and texture. Excellent for pies, soufflé, and any baking recipe calling for pumpkin.*

**Quantity:** 25 Seeds  
**Soil Temperature:** 65 – 95° F  
**Seed Planting Depth:** 1 – 1½”  
**Plant Spacing:** 6” to 12”  
**Row Spacing:** 6’ to 10’  
**Indoor Sowing:** 1-2 weeks before last frost date  
**Direct Sowing:** 3-10 weeks after last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 100-105 days  
**Life Cycle:** Annual

**Companion Plants:** Corn, marigold, melons, nasturtiums, oregano, squash  
**Incompatible Plants:** Potatoes

**RADISH**  
*Cherry Belle*  
200 seeds

*Very popular variety will grow just about anywhere! Shade, sun, indoors or out. Perfect for salads, or in sandwiches.*

**Quantity:** 200 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 2” to 4”  
**Row Spacing:** 12” to 24”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 0-4 weeks before last frost date  
**Germination Time:** 4-12 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool, warm  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 20-30 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, carrots, coriander, cucumber, lettuce, onions, spinach, tomatoes  
**Incompatible Plants:** Beans, hyssop, kohlrabi

**RADISH**  
**French Breakfast**  
 200 seeds

*Popular for mild, slightly spicy and sweet flavor. Harvest smaller sizes for a more delicate flavor. Very easy to grow, one of the simple pleasures of Spring!*

**Quantity:** 200 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 2” to 4”  
**Row Spacing:** 12” to 24”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 0-4 weeks before last frost date  
**Germination Time:** 4-12 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool, warm  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 20-30 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, carrots, coriander, cucumber, lettuce, onions, spinach, tomatoes

**Incompatible Plants:** Beans, hyssop, kohlrabi

**RUTABAGA**  
**American Purple Top**  
 400 seeds

*Large globe shaped root vegetable which is a great low starch substitute for potatoes. Yellow flesh, turns orange when cooked.*

**Quantity:** 400 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 2” to 4”  
**Row Spacing:** 18” to 24”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 4-6 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 90-100 days  
**Life Cycle:** Biennial

**Companion Plants:** Beets, carrots, turnips

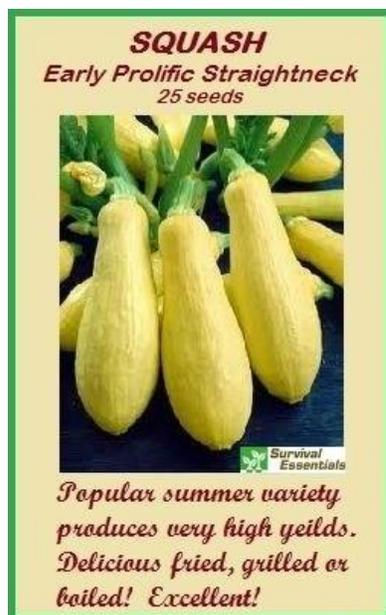

**Incompatible Plants:** Dill, grapes, pole beans, strawberries, tomatoes

**Quantity:** 100 Seeds  
**Soil Temperature:** 45 – 75° F  
**Seed Planting Depth:** ½”  
**Plant Spacing:** 2” to 6”  
**Row Spacing:** 12” to 18”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 4-6 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily);  
 For warmer climates, plant in a shady location.  
**Growing Condition:** Cold, cool, warm  
**Water Requirement:** Moderate  
**Hardiness:** Super Hardy  
**Days to Maturity:** 39-60 days  
**Life Cycle:** Annual

**Companion Plants:** Bush beans, cabbage, celery, eggplant, leeks, lettuce, onions, peas, strawberries

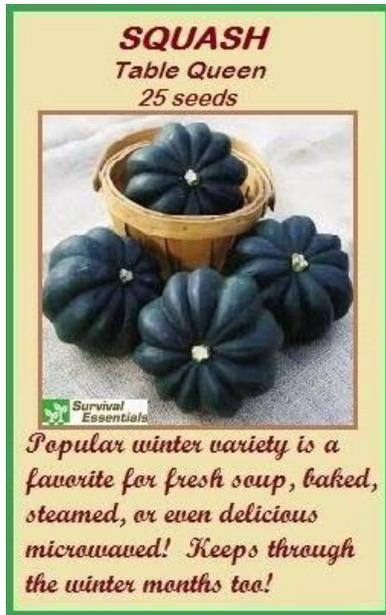

**Incompatible Plants:** Potatoes

**Quantity:** 25 Seeds  
**Soil Temperature:** 60 – 90° F  
**Seed Planting Depth:** ½ – 1”  
**Plant Spacing:** 36” to 48”  
**Row Spacing:** 36”  
**Indoor Sowing:** 1 week before last frost date  
**Direct Sowing:** 3-12 weeks after last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 42-50 days  
**Life Cycle:** Annual

**Companion Plants:** Borage, corn, melons, pumpkins, marigold, nasturtiums, oregano

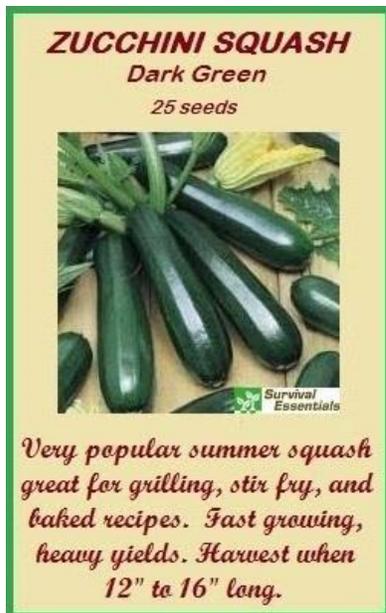

**Incompatible Plants:** Potatoes

**Quantity:** 25 Seeds  
**Soil Temperature:** 65 – 95° F  
**Seed Planting Depth:** ½ – 1”  
**Plant Spacing:** 36” to 48”  
**Row Spacing:** 36”  
**Indoor Sowing:** 1 week before last frost date  
**Direct Sowing:** 3-12 weeks before last frost date  
**Germination Time:** 5-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 58-90 days  
**Life Cycle:** Annual

**Companion Plants:** Borage, corn, melons, pumpkins, marigold, nasturtiums, oregano

**Incompatible Plants:** Potatoes

**Quantity:** 25 Seeds  
**Soil Temperature:** 70 – 95° F  
**Seed Planting Depth:** 1”  
**Plant Spacing:** 24” to 36”  
**Row Spacing:** 48”  
**Indoor Sowing:** 1 week before last frost date  
**Direct Sowing:** 3-12 weeks before last frost date  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** High  
**Hardiness:** Tender  
**Days to Maturity:** 45-65 days  
**Life Cycle:** Annual

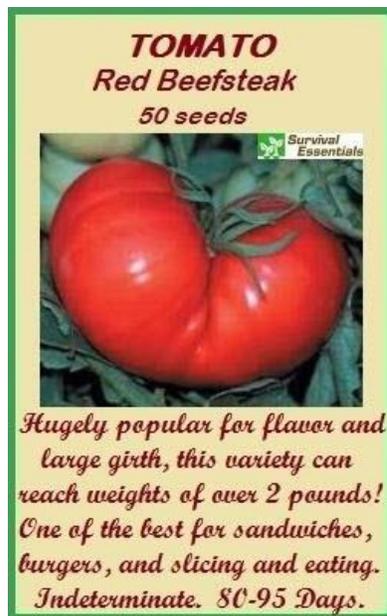

**Companion Plants:** Borage, corn, melons, pumpkins, marigold, nasturtiums, oregano

**Incompatible Plants:** Potatoes

**Quantity:** 75 Seeds  
**Soil Temperature:** 40 – 95° F  
**Seed Planting Depth:** ½ – 1”  
**Plant Spacing:** 6” to 12”  
**Row Spacing:** 18” to 24”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 0-2 weeks after last frost date  
**Germination Time:** 10-21 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 55-60 days  
**Life Cycle:** Biennial

**Companion Plants:** Cabbage, carrots, lettuce, onion, peas, tomatoes  
**Incompatible Plants:** Pole beans

**Quantity:** 50 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 36” to 48”  
**Row Spacing:** 4’ to 5’  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** 4-12 weeks after last frost date; Ideal only for areas with a long growing season.  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Tender  
**Days to Maturity:** 62-115 days  
**Life Cycle:** Annual

**Companion Plants:** Asparagus, basil, beans, borage, carrots, celery, dill, lettuce, melons, onions, parsley, peppers, radishes, spinach, thyme  
**Incompatible Plants:** Broccoli, Brussels sprouts, cabbage, cauliflower, corn, kale, potatoes

**TOMATO**  
**Floradade**  
 50 seeds

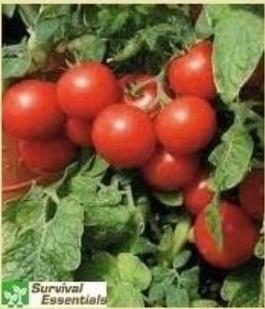

*An excellent multi-purpose tomato, large yields of 8 oz. fruits are great for slicing, canning and cooking. Determinate. 80 days.*

**Quantity:** 50 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 36” to 48”  
**Row Spacing:** 4’ to 5’  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** 4-12 weeks after last frost date; Ideal only for areas with a long growing season.  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Tender  
**Days to Maturity:** 70-90 days  
**Life Cycle:** Annual

**Companion Plants:** Asparagus, basil, beans, borage, carrots, celery, dill, lettuce, melons, onions, parsley, peppers, radishes, spinach, thyme

**Incompatible Plants:** Broccoli, Brussels sprouts, cabbage, cauliflower, corn, kale, potatoes

**TOMATO**  
**Red Cherry, Large**  
 50 seeds

*This favorite is loved for its very high yields of very sweet 1.5” fruits. Excellent salad tomato, and perfect for eating right off the vine! 75 days*

**Quantity:** 50 Seeds  
**Soil Temperature:** 75 – 85° F  
**Seed Planting Depth:** ¼”  
**Plant Spacing:** 18” to 24”  
**Row Spacing:** 3’ to 4’  
**Indoor Sowing:** 6-8 weeks before last frost date  
**Direct Sowing:** 4-12 weeks after last frost date; Ideal only for areas with a long growing season.  
**Germination Time:** 7-10 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot  
**Water Requirement:** Moderate  
**Hardiness:** Tender  
**Days to Maturity:** 70-90 days  
**Life Cycle:** Annual

**Companion Plants:** Asparagus, basil, beans, borage, carrots, celery, dill, lettuce, melons, onions, parsley, peppers, radishes, spinach, thyme

**Incompatible Plants:** Broccoli, Brussels sprouts, cabbage, cauliflower, corn, kale, potatoes

**TURNIP**  
*Purple Top*  
400 seeds

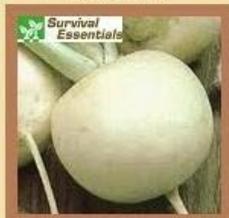

*An all time favorite. Versatile in the many ways to prepare and eat, a true staple of the root vegetable family. Very easy to grow. Mass plant for greens and to attract deer.*

**Quantity:** 400 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 4” to 6”  
**Row Spacing:** 12” to 18”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2-4 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 50-55 days  
**Life Cycle:** Biennial

**Companion Plants:** Cabbage, celery, dill, onions, peas, mint, rosemary, sage  
**Incompatible Plants:** Delphinium, larkspur, pole beans, potatoes, radish, mustard

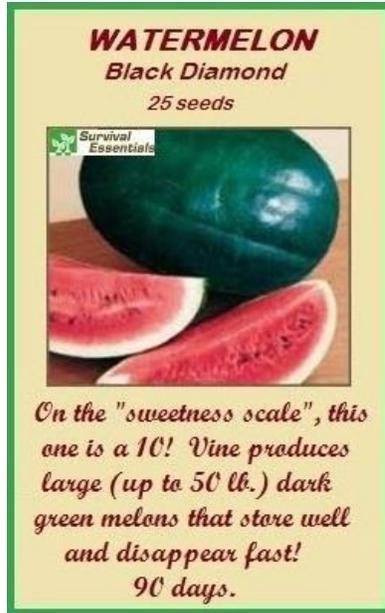

**TURNIP**  
*Shogoin*  
400 seeds

*Produces solid white globe turnip, best when harvested at around 4” in diameter. One of the best varieties for greens. Tops grow to about 20” tall.*

**Quantity:** 400 Seeds  
**Soil Temperature:** 45 – 85° F  
**Seed Planting Depth:** ¼ – ½”  
**Plant Spacing:** 4” to 6”  
**Row Spacing:** 12” to 18”  
**Indoor Sowing:** Not recommended  
**Direct Sowing:** 2-4 weeks before last frost date  
**Germination Time:** 7-14 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Cold, cool  
**Water Requirement:** Moderate  
**Hardiness:** Hardy  
**Days to Maturity:** 50-55 days  
**Life Cycle:** Biennial

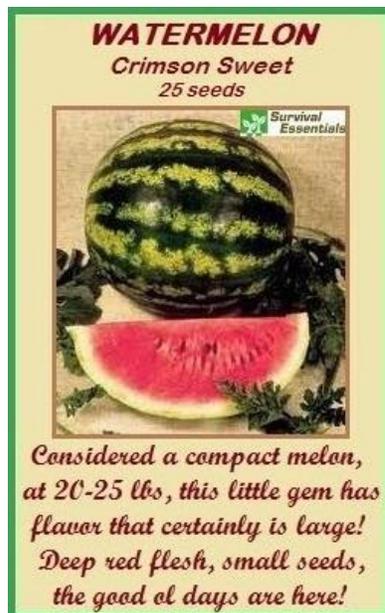

**Companion Plants:** Cabbage, celery, dill, onions, peas, mint, rosemary, sage  
**Incompatible Plants:** Delphinium, larkspur, pole beans, potatoes, radish, mustard

**Quantity:** 25 Seeds  
**Soil Temperature:** 75 – 80° F  
**Seed Planting Depth:** 1"  
**Plant Spacing:** 3'  
**Row Spacing:** 6'  
**Indoor Sowing:** 3-4 weeks before last frost date  
**Direct Sowing:** 3-4 weeks after last frost date;  
 Ideal if your growing season is long & hot enough.  
**Germination Time:** 5-8 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot, long days  
**Water Requirement:** Moderate  
**Hardiness:** Very Tender  
**Days to Maturity:** 90-100 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, corn, marigolds, nasturtiums, oregano, pumpkins, radish

**Incompatible Plants:** Beans, black walnut, cucumber, mustard, potatoes, squash, zucchini

**Quantity:** 25 Seeds  
**Soil Temperature:** 75 – 80° F  
**Seed Planting Depth:** 1"  
**Plant Spacing:** 3'  
**Row Spacing:** 6'  
**Indoor Sowing:** 3-4 weeks before last frost date  
**Direct Sowing:** 3-4 weeks after last frost date;  
 Ideal if your growing season is long & hot enough.  
**Germination Time:** 5-8 days  
**Sun Exposure:** Full Sun (6 hours daily)  
**Growing Condition:** Warm, hot, long days  
**Water Requirement:** Moderate  
**Hardiness:** Very Tender  
**Days to Maturity:** 90-100 days  
**Life Cycle:** Annual

**Companion Plants:** Basil, corn, marigolds, nasturtiums, oregano, pumpkins, radish

**Incompatible Plants:** Beans, black walnut, cucumber, mustard, potatoes, squash, zucchini

**STORING**

## Best Storage Tips for Your Heirloom Seeds

Heirloom seeds are very practical because they can provide a seed supply and food source for a lifetime. All you have to do is preserve the seeds that come from your harvests, keep them in pickle jars, and you can use them for many decades to come! You can even save money because you won't have to buy new seeds at the beginning of every season.

For more seed-storing tips, check these ones below:

- When saving seeds from your heirloom crops, you'll want to air-dry them for a week before storage. Just lay them out on newspapers until they're completely dry. Add labels so as not to mix them up. There are many videos on youtube.com that show you exact methods of processing and drying the many different varieties of heirloom seeds from the vegetables you harvest from your garden.
- To prolong the shelf life of your heirloom seeds, you need to always keep them away from moisture. Do this by first putting them in ziplock bags and then placing them inside airtight containers. Glass jars work well as containers for your heirloom seeds.
- Use desiccants like silica gels to remove the excess humidity and moisture in your seed jar. Put them inside the jar with your ziplock seed bags and tightly seal the container. The desiccant should never come in direct contact with the heirloom seeds—hence the reason for using plastic bags. Remember to change the desiccant every six months as well.
- Aside from moisture, heat is one of the worst enemies of seed storage. Never expose the seeds to any kind of heat because it will shorten their viability.

- The best place to store your seeds is in the darkest, driest and coolest part of your house. The refrigerator is a good option. Simply put your glass jars in the fridge for long-term storage, but never take them out unless you're ready to plant them. Freezing is a viable way to save seeds for up to a decade or more, just follow the same directions but place them into the freezer instead of the refrigerator.
- Once you're ready to use the seeds, take the jars out from the refrigerator but don't remove their lids just yet. Wait until the seeds have reached room temperature so you can prevent moisture from clumping the seeds together. (opening the seeds prior to reaching room temperature will cause condensation to form, potentially causing your seeds to split open when re-frozen)
- Label and date your heirloom seed containers. This way, you can instantly tell which is which and how old they are. It's also a good idea to organize the seeds according to the season they were harvested for easy tracking.

Note that heirloom seeds have different shelf lives depending on their variety. For more information you can do a Google search for: shelf life of heirloom vegetables.

So those are the best storing tips for preserving your heirloom seeds. Follow them properly so you can effectively save and store your seeds for future use.

## Thank You!

Once again, we at Grow For It! would like to thank you for your purchase. We hope you will find all the information here to be useful for your home garden.

If you have inquiries or need help on your heirloom seeds pack, please don't hesitate to contact us at:
